

Comparative ICU Surveillance Data Graphs

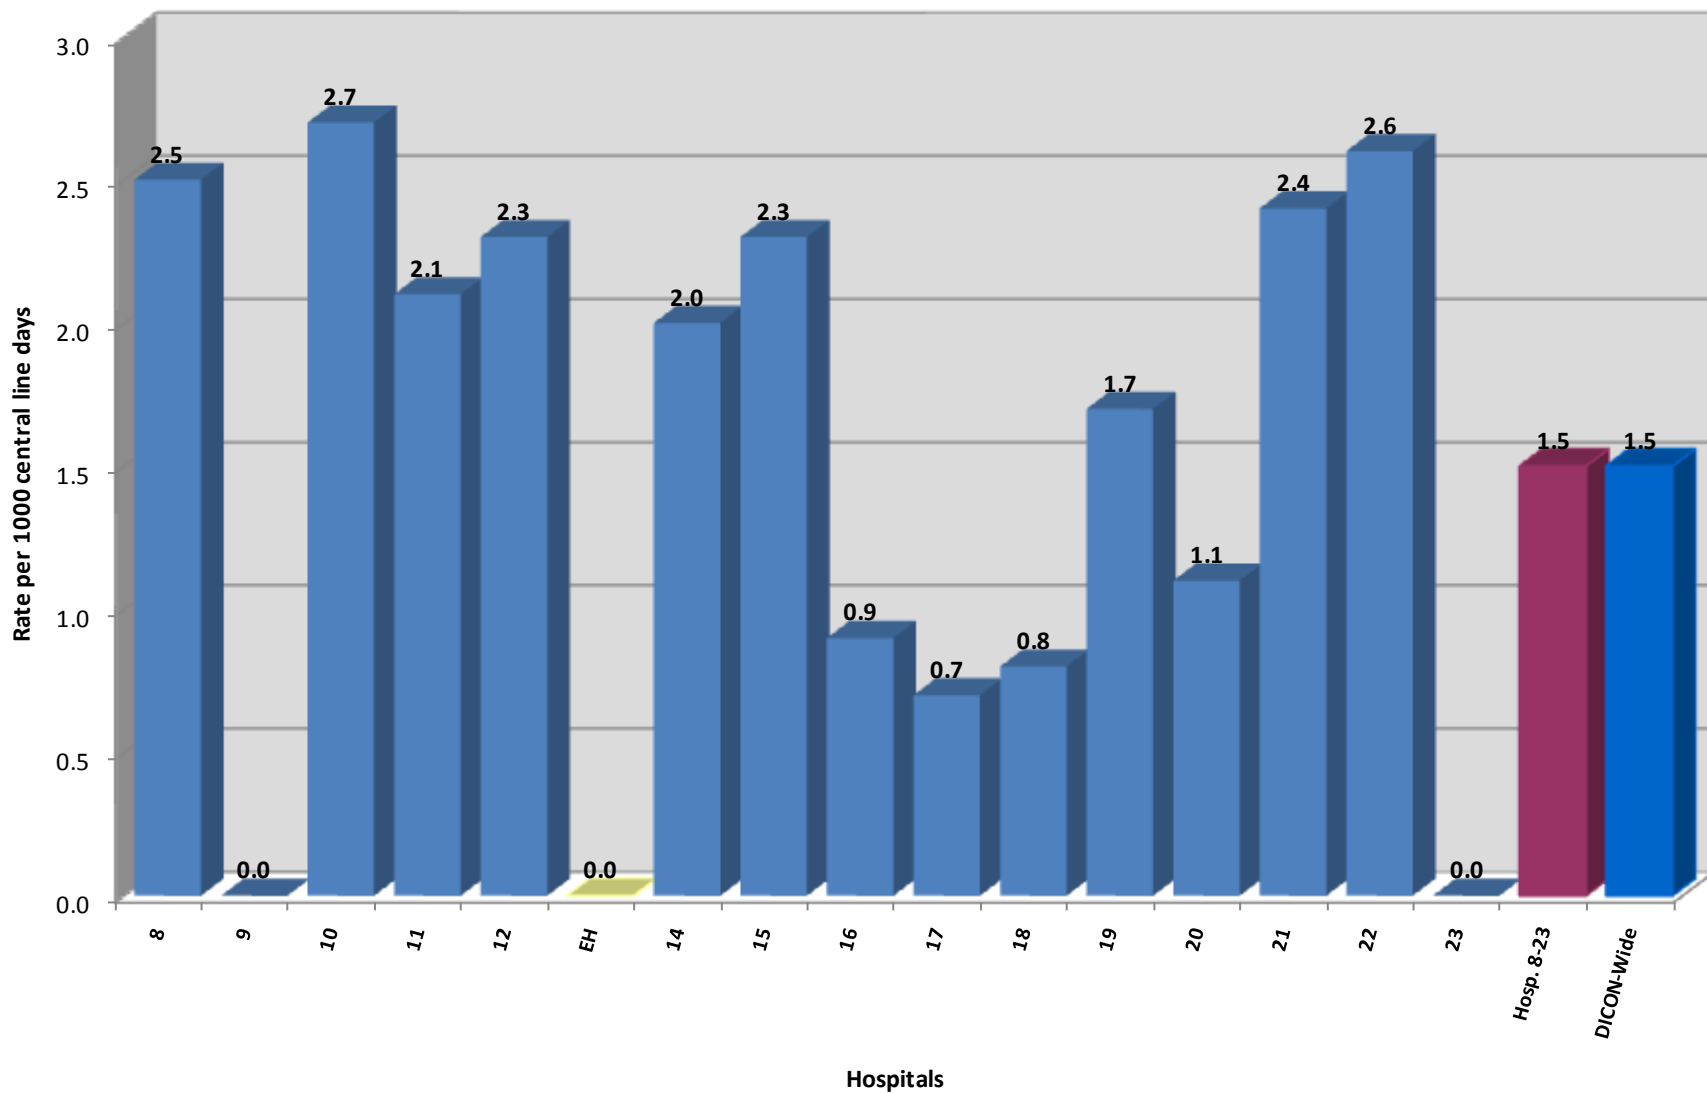

January - December 2010

Example Hospital

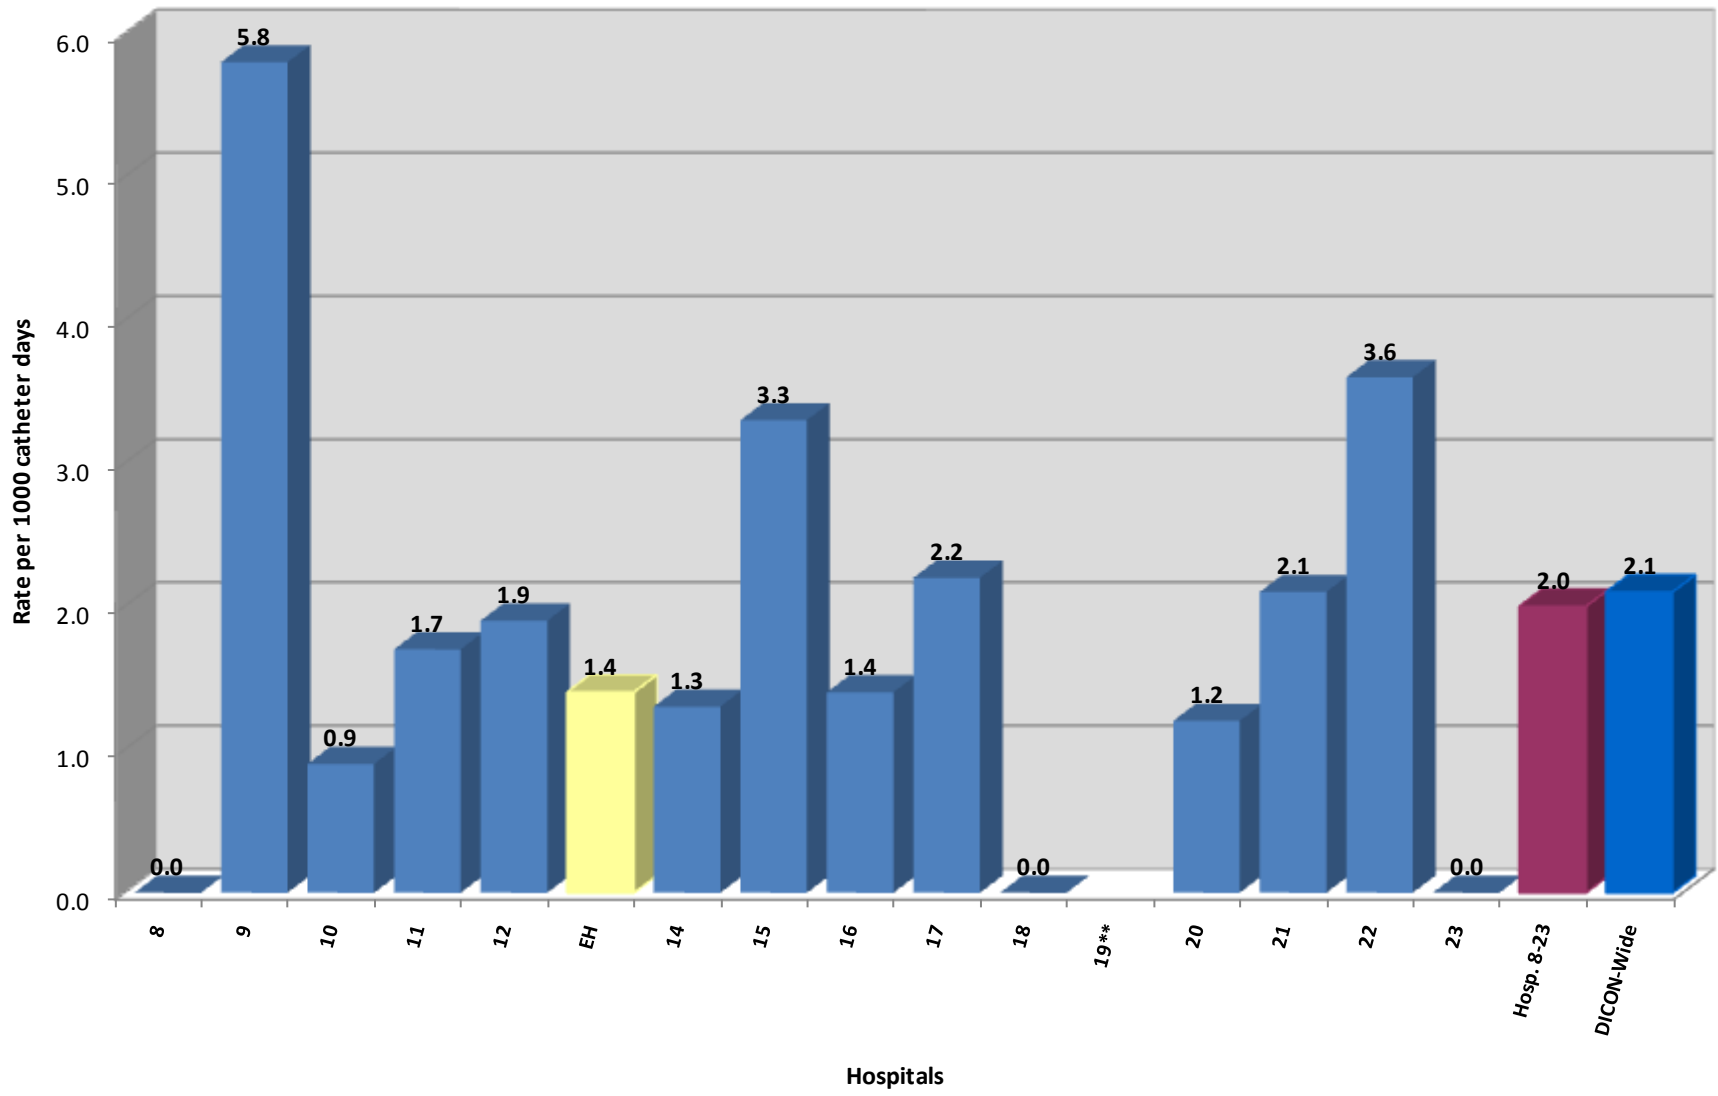

Contents

- Hospital-Acquired ICU Central Line Associated Bloodstream Infections
- Hospital-Acquired ICU Catheter Associated Symptomatic UTI
- Hospital-Acquired ICU Ventilator Associated Pneumonia
- ICU Central Line Utilization Rate
- ICU Urinary Catheter Utilization Rate
- ICU Ventilator Utilization Rate

Hospital-Acquired ICU Central Line Associated Bloodstream Infections January - December 2010 (Hospitals 30,000 to 70,000 annual patient days)

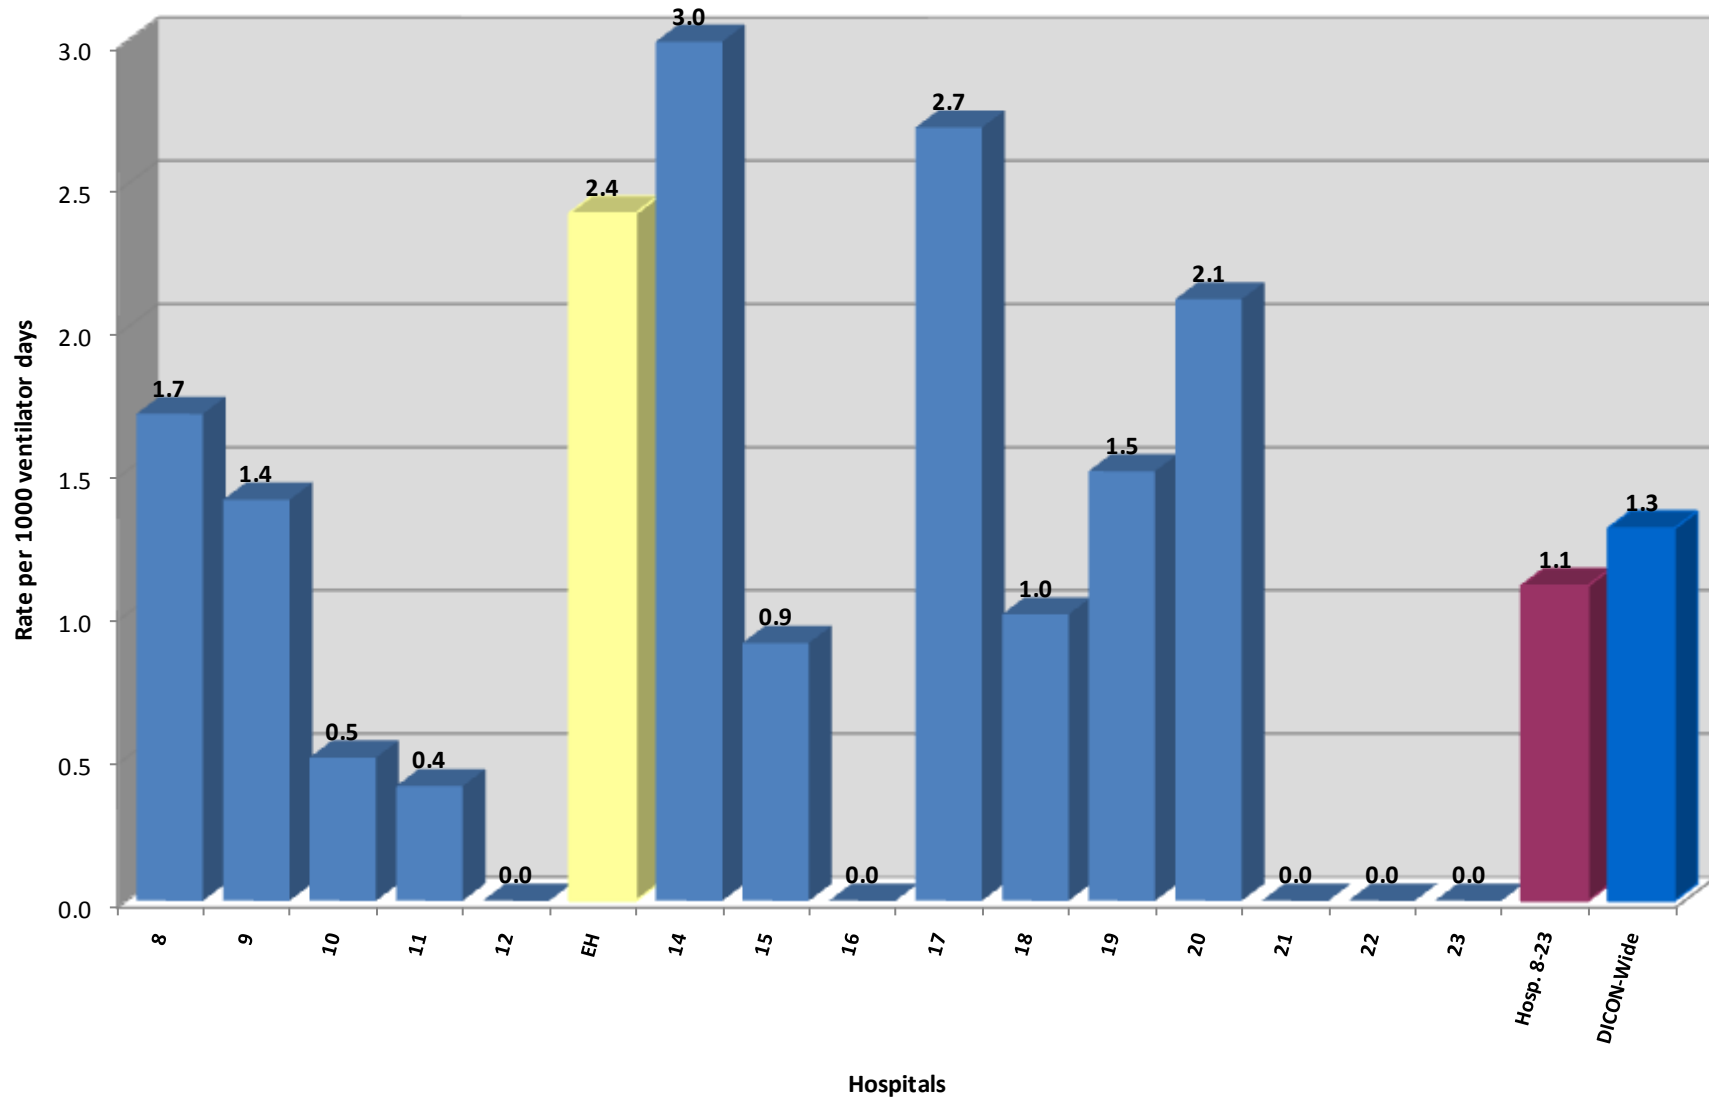

Hospital-Acquired ICU Catheter Associated Symptomatic UTI January - December 2010 (Hospitals 30,000 to 70,000 annual patient days)

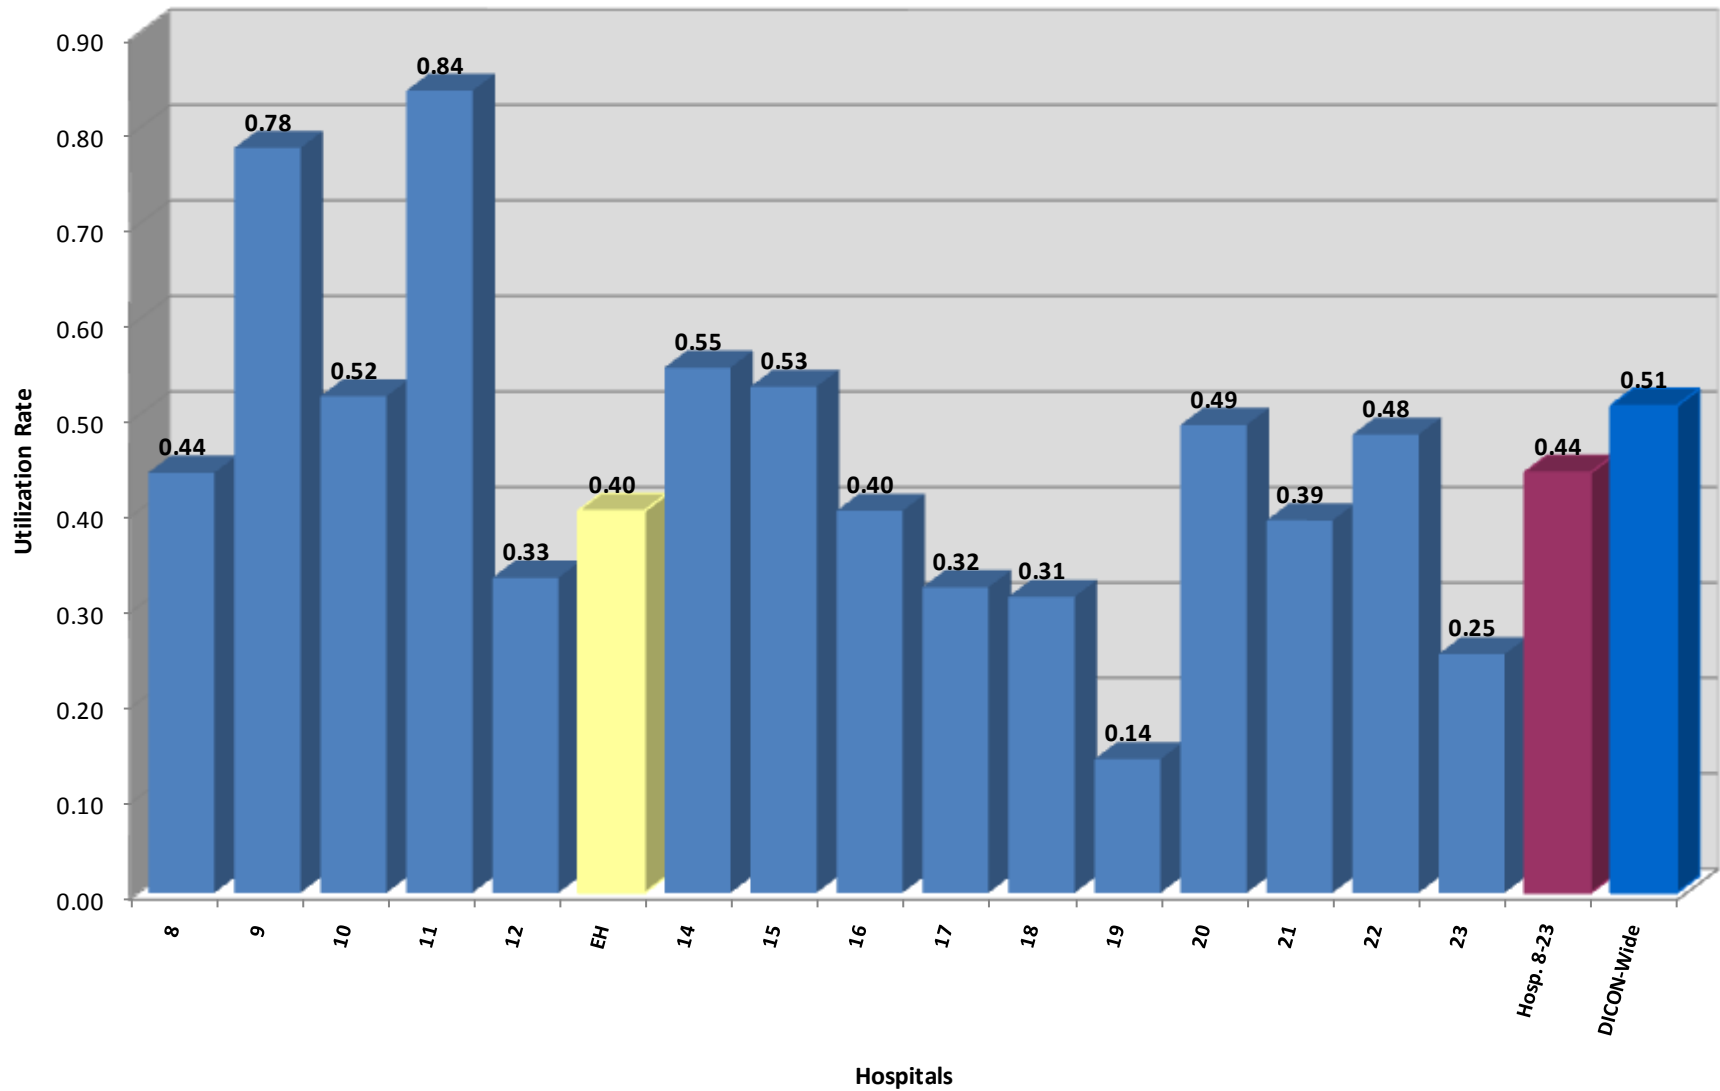

** hospital did not participate

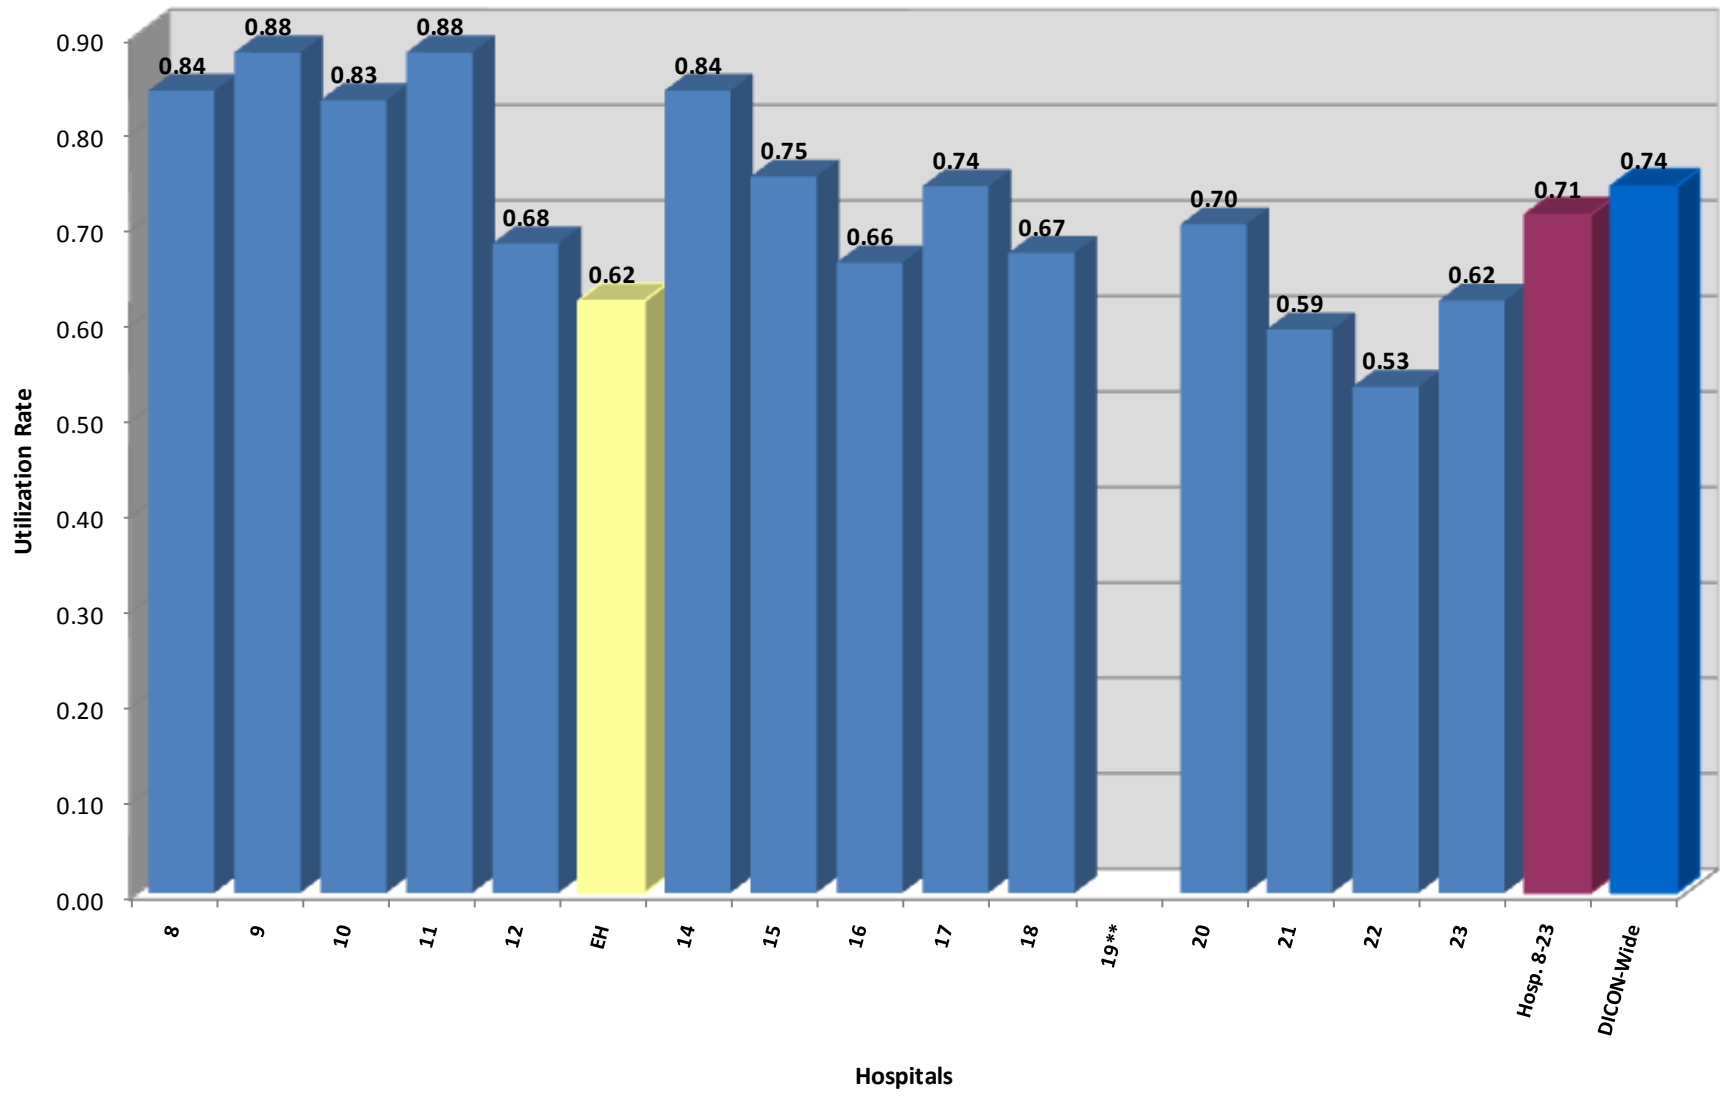

Hospital-Acquired ICU Ventilator Associated Pneumonia January - December 2010 (Hospitals 30,000 to 70,000 annual patient days)

ICU Central Line Utilization Rate January - December 2010 (Hospitals 30,000 to 70,000 annual patient days)

ICU Urinary Catheter Utilization Rate January - December 2010 (Hospitals 30,000 to 70,000 annual patient days)

** hospital did not participate

ICU Ventilator Utilization Rate January - December 2010 (Hospitals 30,000 to 70,000 annual patient days)
